

### In the Specification

Please amend the specification as follows:

On page 7, please amend the paragraphs on lines 1 and 11 as follows:

Referring to Figure 2, a communications network ~~24~~ 20 for delivering content to a mobile terminal ~~20~~ 22 is shown. The communications network ~~24~~ 20 includes a terrestrial digital video broadcasting (DVB-T) or a DVB-H network, which is used as a broadcast access network to deliver content for an Internet Protocol Data Casting (IPDC) service. However, other digital broadcast networks may be used including other types of DVB networks, such as a cable DVB network (DVB-C) or satellite DVB (DVB-S) network, a Digital Audio Broadcasting (DAB) network, an Advanced Television System Committee (ATSC) network or an Integrated Services Digital Broadcasting (ISDB) network.

The communications network ~~24~~ 20 includes sources 23-1,23-2 of content, for example in the form of video, audio and data files, a content provider 24 for retrieving, re-formatting and storing content, a datacast service system server 25 for determining service composition, an Internet-protocol (IP) encapsulator (IPE) 26 and a transmitter 27 for modulating and broadcasting a signal 28 to receivers (not shown) including a mobile terminal ~~20~~ 22.
